The retired life is not
always easy. Pumbra gets
upset the others keep
showing up with work
they can not figure out
and ask me to finish it.
Just the other day
someone brought over a
chest, and could not fix
all three magic traps on
them. I showed them the
foolish approach to trying
to work from the opening
of the chest, and
suggested they simply cut
out the bottom, install
the traps, and magically
repair what they broke. I
swear, so easy!
